

GLASS BOARD MAINTENANCE

The diamond glass surface is ideal for dry-erase markers.

**However, the quality of the markers used can have an impact on cleaning the board.
So it is important to find the right marker for your needs.**

**You can leave writing on the glass board for several days without any problems.
One of the best features of the board is how quick and easy it is to clean.
A standard dry-erase eraser or soft cloth are all you need to remove dry-erase marks.**

**To extend the effective life of your board, weekly maintenance is recommended.
For a deep clean, use warm soapy water (degreasing dish soap) to restore it to its original color.**

You can also use name-brand glass cleaners to remove all marks from your glass board.
